Environmental impact assessment (EIA) is a tool to aid environmental decision making. It is a process that allows for public involvement when positive and negative impacts (opportunities and constraints) that are associated with a proposed course of action are assessed. The aim of this is to determine the best practicable course of action.

### Environmental Impact Assessment (EIA)

Environmental Impact Assessment (EIA) is the process of examining the anticipated environmental effects of a proposed project - from consideration of environmental aspects at design stage, through consultation and preparation of an Environmental Impact Assessment Report (EIAR), evaluation of the EIAR by a competent authority, the subsequent decision as to whether the project should be permitted to proceed, encompassing public response to that decision.

### Environmental Impact Assessment :: Environmental ...

Environment Impact Assessment is a process of analyzing the positive and negative effects of a proposed project, plan, or activity on the environment. This may include studies on the weather, flora and fauna, soil, human health including physical, social, biological, economic and cultural impacts.
