Stress Analysis Ebook
Stress Analysis is a highly specialized field of mechanical or aerospace engineering. Stress analysis is all about structural analysis of different components on an aircraft. It involves sizing (for stress optimized dimensions) of components under various loads obtained from FEA and modeling, and then documenting all the analysis in the form of reports or stress notes.

The redistribution of stress in a body caused by introducing a crack or notch may be solved by methods of linear-elastic stress analysis. Of course the greatest attention should be paid to the high elevation of stresses at or surrounding the crack-tip, which will usually be accompanied by at least some plasticity and other nonlinear effects.
